SECURITY & PRIVACY BARRIERS

when minutes & privacy matter most

About Us

We are on a mission

SRN Systems began with an inspired mission to protect roadside accident victims' privacy from rubbernecking onlookers; today our patented portable privacy and security barriers protect first responders, victims, evidence and more quickly and effectively when minutes matter most.

Originally intended to shield crime and accident scenes, we've evolved and expanded to protect first responders, homicide investigations, medical, military, retail, hospitality, entertainment and education venues as **Barrier by Design**, a woman-owned company committed to manufacturing the very best customizable, expandable, privacy and security barrier systems in the USA.

Over 450 law enforcement, universities, hospitals and first responders protect their teams, evidence, victims, and stakeholders with Barrier by Design barrier systems, Scene Shields and Triage Tents.

We are proud to partner with them and would be honored to become yours.

BARRIERS IN ACTION

TESTIMONIALS

"The Scene Shields system is very easy to use and requires very little training for officers. It's a quality product that works great for accidents, crime scenes, and pedestrian traffic control during public events. The team is great to work with, and has customer service that cannot be beat."

PRATT KANSAS SHERIFF

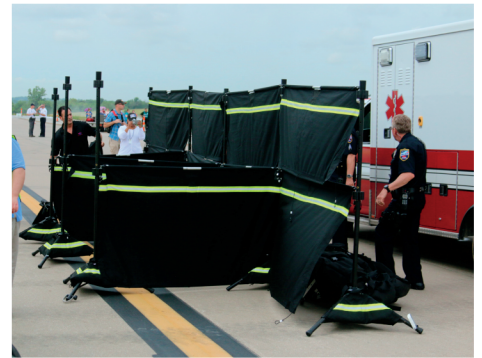

"Outstanding! We have been looking for this type of barrier system for a long time. We are very pleased. Our evidence techs and major crimes task force also use SCENE SHIELDS. We have put in a request to purchase another system"

SKOKIE ILLINOIS CHIEF OF POLICE

"We use our Barrier System primarily on fatality crash scenes. It keeps those that have no need to see the victims from doing so. I feel like it has likely prevented pictures/videos from being strewn across the internet by those who don't respect the victim's families in such matters. Easy to assemble and seems to be well made thus far"

SPRINGFIELD MISSOURI POLICE

"Used it almost immediately on a Homicide at a Dry Cleaners, was able to place it at the front door; gave us the entry exit we needed, but allowed privacy from the media, helicopter filming, and gawking bystanders. Set up quickly after getting it there and we have ordered more extensions."

LAKE MARY FLORIDA POLICE

"We have deployed this system at several crime scenes. It's easy to set up and one person can have it complete in just a few minutes. It provides privacy for the detectives to do their work, and respect to the victim and family. The barrier has proved to be an asset to our investigative team. I would definitely recommend this portable barrier system to any agency."

CONCORD CALIFORNIA POLICE

"The scene screens (barriers) from SRN have worked successfully on numerous occasions. They are very simple to set up and easily stored in the cases. They were a vast improvement from the screens that we previously used and they seem to be durable for extensive use. We would purchase these again."

GOOGLE REVIEW

"In 2014, we purchased two Barrier Systems. We have used them primarily for fatal traffic collisions and major incidents, which have provided scene security for our officers and dignity for the victims. In 2015, we purchased two more systems to increase our ability to secure a major scene from the public eyes. We are very happy with the system, easy setup and highly recommend it to any police or fire department."

MANHATTAN BEACH POLICE DEPARTMENT

We used the system on an interstate grass medium where a car hit a semi head on in the wrong lane and burned up. We set up the barrier system for control of the scene and protecting the integrity of the body.

LAVISTA NEBRASKA POLICE DEPT.

HOW IT WORKS

IN MINUTES, NO TOOLS

BARRIER BY DESIGN, SCENE SHIELDS AND TRIAGE TENTS secure accident and emergency sites in less than 5 minutes without using tools.

Adjustable steel poles extend and adapt to all environments, indoor or outdoor, weighted bases secure in all conditions.

Wind resistant, durable blackout screens feature reflective striping, emergency lighting and your logo to quickly and effectively obstruct view and identify who's in command.

Our mission is to protect the integrity, provide privacy and secure sites in emergencies. First responders, investigators and examiners have come to rely on BARRIER BY DESIGN as an essential tool in securing their sites and protecting people and evidence.

"Outstanding! We have been looking for this type of barrier system for a long time. We are very pleased. Our evidence techs and major crimes task force also use SCENE SHIELDS. We have put in a request to purchase another system"

- Airports
- Convention centers
- Hospital & Healthcare
- Football field
- Outdoor dining
- Construction site
- Classroom
- And more

Talk to our team - we'll build the barrier you need.

The Scene Shields barrier system has provided us with the privacy on crash scenes that we needed. We have used it to protect the privacy and dignity of the victims at fatal crash scenes. It not only provides us with a public field of view obstruction, but also assisted in traffic control as it reduced the "rubbernecking." It is professional in appearance and much more durable than our previous system. Our department would highly recommend the Scene Shields Barrier System.
